## Community

### Supporting Through Donations

In 2006, KW-Consulting-Group started to activate its community work in the form of donations. Each year, one or two projects are being searched worldwide, which shall be sponsored by the contribution of our group. The main focus of the sponsorship lies in the field of child, youth and training support.

Thus, Krapohl-Wirth ensures that a part of its turnover serves to fulfil adolescent wishes which otherwise would not be possible. Our clients support us in this by means of their loyalty to our company. This way, we were able to start this action and hope to be able to continue it on a long-term basis.
